

LAUGFS OPTIMA

Economically drives ecological

Lower Energy Consumption

Tread compound designed with low hysteresis properties

Ride Comfort

Middle layer protects from hysteresis and provides an excellent cushion effect

STABILITY

Flat tread surface increases tyre stability and grip

Massive tread depth

increases tyre life and traction

LAUGFS OPTIMA TYRES have been engineered to facilitate the demand of material handling equipment using environmentally friendly materials. Providing the lowest cost per hour and high wear life, it is an exemplary choice for economically steered customers.
